

Job Description

Installer

Purpose: Serve as the face of the company in the field, installing radon mitigation systems in homes. Fit into a company culture where Jesus is worshiped and conservative values are honored and discussed.

Responsibilities

- Meet & greet the homeowner.
- Design and install a mitigation system to meet the homeowner's needs.

Physical attributes

- Able carry 5 gallon buckets of sand from the basement to the truck.
- Comfortable on roofs, on ladders and in tight attics and crawl spaces.
- Able to squeeze into tight spaces.
- Wholesome and clean-cut appearance.

Natural gifts

- Exceptional mechanical aptitude
- Able to visualize in 3 dimensions.
- Able to prioritize multiple conflicting variables to design good mitigation systems.
- Enjoy problem solving.
- The heart of a servant. Enjoy serving others, even when nothing is expected in return.
- Independent. Thrive while working with little or no supervision.
- Enjoy doing quality work, even when you know it will never be inspected.
- Enjoy doing a job quickly and efficiently.
- Traditional. Comfortable following "The Company Way".

Experience

- H.S. diploma or GED.
- Valid Minnesota driver's license.
- Able to lay out and frame a home.
- 5 years' experience in a construction trade.

Post-hire training

- Get certified in radon mitigation and testing and do continuing ed to maintain certification.

Outcomes

- Your work meets company standards.
- Your clients give you a 100% approval rating.
- Your fellow employees are glad you're here.
